

currenza **C² spider**

Revolutionary compact
coin recycling system

**Recycling of up to 8 coin
denominations**

Increased coin payout capacity by
employing two additional hoppers

Full coin recycling via 6-tube
cassette and two hoppers

High payout speeds; considerably
reduced waiting times at exit lanes

currenza

Revolutionary compact coin recycling system

currenza c² spider

The currenza c² spider combines a 6-tube coin changer with an additional high-speed diverter – creating the first 10-fold sorting system with a coin recycling capability of up to 8 different denominations.

The revolutionary recycling system:

- The currenza c² spider validates and pays out up to eight different coin denominations as change
- Inserted coins are directed to either:
 - the machine's cash-box or
 - one of the six tubes in the coin cassette or
 - up to two ccTalk hoppers via the integrated sorter
 - rejected coins are directed to the coin return area
- Coin cassette and hoppers completely managed by the c² changer
- Intelligent Coin Payout recognises which denominations are available

Profitability:

- Full recycling via hoppers reduces need for manual refilling; thus reducing service calls and costs
- Payout capacity increased significantly – e.g. for 1Euro coin; from total of 264 (4 x c² tubes) to 1684 (4 x c² tubes + 2 h²X size)
- High payout speed of up to 3 coins/ second, considerably reducing transaction times at exit lanes
- Small footprint allowing smaller machines
- Less integration costs due to easy plug and play solution
- MDB, RS232 and USB interfaces available for easy integration

Reliability:

- NRI MFT technology, 3 payout motors, 6-tubes from the c² coin changer
- Full graphical display for easy settings and diagnostics
- NRI solenoid-sorting technology for high sorting reliability
- Industry leading operating temperature of -25 to +80 °C guarantees reliable operation in the harshest environmental conditions

Accessories:

- currenza h² ccTalk compact hopper; available in 4 bowl sizes
- adapter cable for second hopper

The currenza c² spider is the revolutionary concept for compact machines – offering significantly larger, fully recyclable, payout capacity.

1 EURO capacity

Fast sorting & payout

6 tube cassette

Optional h² hopper

Full graphical display
