3 1/2" Coin Acceptor

Key Features

- Unique MFT coin validation technology for highest coin security
- Simultaneous evaluation of 24 measurement parameters for 32 coin channels
- Protection against string manipulation
- Optical monitoring of coin path for higher security
- Inhibit of single groups or coin groups via DIL switch
- Remote download capabilities
- Multiple interfaces available
- HENRI+ service tool
- Optional hardness detector

Optional Coin Sorter

- High Sorting Reliability
- 3-way sorter Standard
- 3-way High Speed Sorter s2 HSD 3000

High Security

The Crane Payment Solutions v2 colibri uses the unique MFT Multi-Frequency-Technology to provide the highest coin validation security. The high security provides protection against string manipulation, simultaneous evaluation of 24 measurement parameters for 32 coin channels and optical monitoring of the coin path for higher security.

Flexibility

The v2 colibri is a highly flexible product. The colibri has one step download capabilities and is available with the HENRI+ on site service tool and powerful WinEMP software allowing easy update of coin and configuration data sets. The v2 colibri also features a teach function for up to 8 coins / tokens as standard. Hardware includes both 16 pin and 10 pin connectors for easy machine integration.

Versatility

The v2 colibri is available with multiple machine interfaces including serial S1, serial MDB, ccTalk, parallel and SGI (Simple Gaming Interface) with fast coin acceptance for casino applications. Accessories for the v2 colibri include front plates, sorters and a wake-up sensor for low power applications. There is also an option for coin changer compatible housing (long channel).

Optional Front-Plates

- Front-Plate & Mini-Front-Plate
- Choice of Colours
- Industry Standard Mount
